

We offer a selection of different font types and colours for your boat lettering. Films are supplied on a transparent carrier film, which makes it easy to apply them to the surface.

LETTERING

Self-adhesive UV-, seawater- and weather-resistant films according to your dimensions and designs

GRAPHICS

Instructions for applying the foil:

1. Clean the surface thoroughly. The surface must be grease-free and clean, if not, the foil may not stick and could come off after a couple of days.
Note: Remove glue or grease stains easily with alcohol, without damaging the surface.
2. If necessary, draw guidelines or marking points on the surface with a pencil (especially recommended with long labels).
3. Wet the surface and foil with a soap/water mixture (add soap to the water until it foams) – the wetter the surface, the easier it is to move and adjust the position of the foil.
4. Apply the foil to the surface and carefully move it to the desired position.
5. Remove water and air bubbles carefully using a plastic squeegee. Work from the middle of the foil to the outside. Apply stronger pressure to fix it.
6. Soak the top foil with soap/water mixture for several minutes until the top foil can easily be removed from the colour foil. Pull off the top foil in an angle greater than 140°. Leftover air bubbles should be smoothed out carefully.
7. Allow the foil to stick to the surface – done!
The glue underneath the foil will reach its full adhesion

Details for producing plotted fonts:

For the production of graphics according to your requirements, we require a corresponding template. Vector graphics or the following data formats can be used, which we can convert into vector graphics: pdf, ai, eps or png files.

Text:	
Type of font:	
Color No.:	
Font width in mm:	
Font height max. in mm:	
Quantity:	

Details for production of own or prefabricated graphics:

For the production of graphics according to your own we require a corresponding template. Vector graphics or the following data formats can be used, which we can convert into vector graphics: pdf, ai, eps or png files.

Please enter the desired dimensions, the colour number and the desired quantity in the following table. You will find help in determining the price for your graphic on page 4.

Graphic:		per mail:
Color No.:		
Graphic max. size in mm (w x h):		
Quantity:		

Individual fonts and graphics:

Convert font or graphic into a vector file

Save as eps, png, pdf or ai format

Send text/graphic to: info@svb.de

NOTE:

Only monochrome fonts or graphics can be converted. Fonts or images with colour gradients cannot be converted!

Colors:

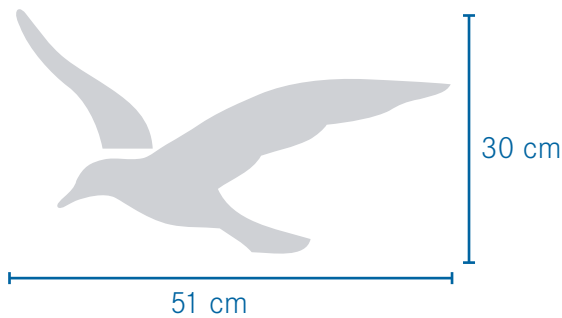

We use foils with shiny surfaces. The material is seawater-, wind-, weather- and UV-proof. The manufacturer offers a 5 year warranty on this product.

Color aberrations may be caused by printing.

DATASHEET

Price overview fonts & graphics

Calculation example:

The graphic should have a width of 51 cm and a height of 30 cm.

$51 \times 30 \text{ cm} = 1.530 \text{ cm}^2$
results in a price of 19,95 €

NOTE: Please note that the shorter side length of the graphic must not exceed 55 cm!

We would love to send you a quote for your self-designed graphic. Just send us your individually created pattern

Prices for vector graphics:

Define the size of the image and use the following table to determine the price of your graphic.

Size max:	Price:
100 cm ²	8,95 €
250 cm ²	10,95 €
500 cm ²	12,95 €
800 cm ²	14,95 €
1000 cm ²	17,95 €
1500 cm ²	19,95 €
2000 cm ²	21,95 €
2500 cm ²	26,95 €
3000 cm ²	31,95 €
3500 cm ²	36,95 €
4000 cm ²	41,95 €
4500 cm ²	47,95 €

Calculation example:

The height of the word is always measured on the first letter. The word Harlequin is supposed to have a height of 7,5 cm.

Price per letter: 2,30 € = 9 letters x 2,30 €
results in a price of 20,70 €

Prices for fonts per letter:

Hight max:	Price:
30 mm	2,20 €
40 mm	2,40 €
60 mm	2,70 €
80 mm	3,30 €
100 mm	3,90 €
120 mm	4,80 €
150 mm	5,50 €
170 mm	7,40 €
200 mm	8,20 €
250 mm	8,70 €
300 mm	10,20 €
400 mm	13,20 €
